

# Software Update

S. Margetis, KSU

# Outline (as per Flemming's email)

- Progress and issues
- Milestone status
- Operations support

# Prioritized list of activities

Items in RED were updated since last meeting

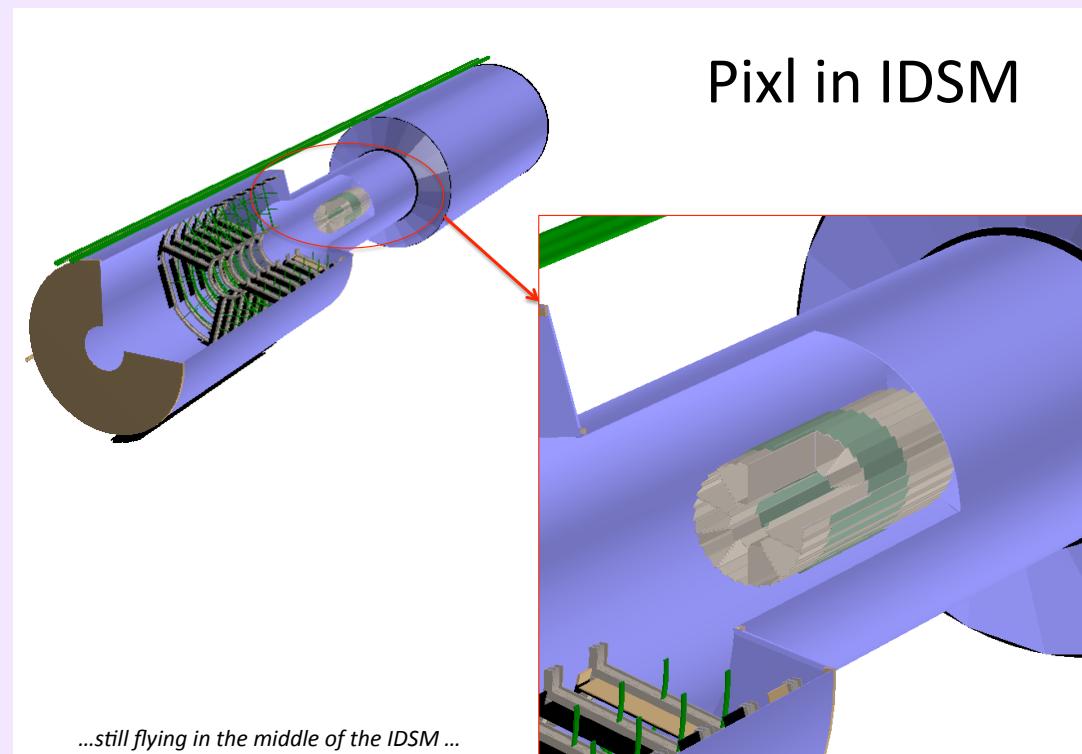

- Survey + related work
- HFT Geometry model (rebuild)
- 'online' data format/slow controls/online QA/Db considerations
- Slow/Fast PXL response simulation
- Prototype tracking
- Conventions (naming revisited)
- -----
- Evaluation/Analysis framework
- -----
- Kalman fitter for decays
- Tests of new/old tracker
- Hit reconstruction
- Event vertex finders

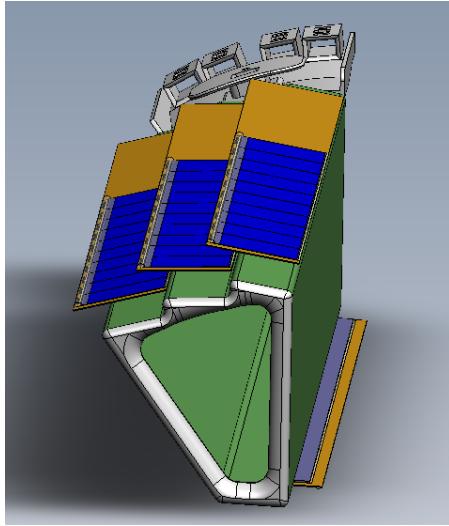

## CMM measurements + related work for PXL fixture and prototype sectors

- In view of Leo's schedule for real prototype sector building (~october 2012)
- Requires pre-Prototype sector to be build
  - I assume we can start immediately after this is done
  - Bob needs to have model in place (?)
- It is getting tight
  - Review in April 2012

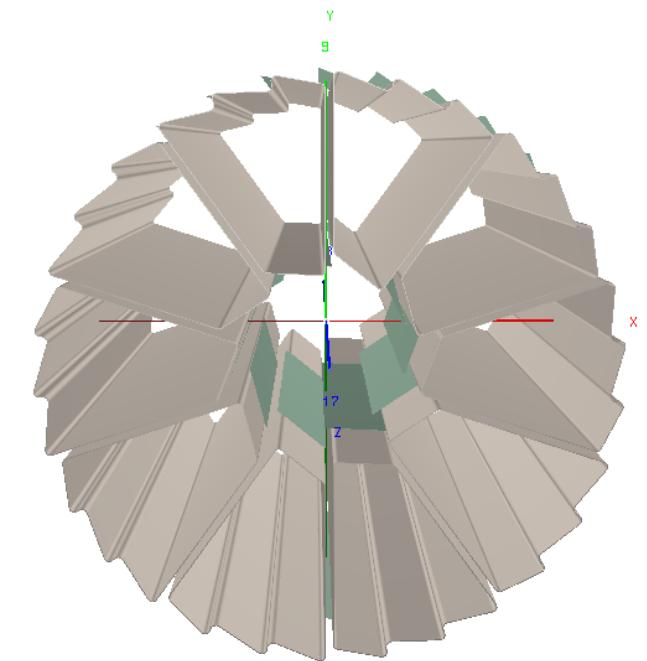

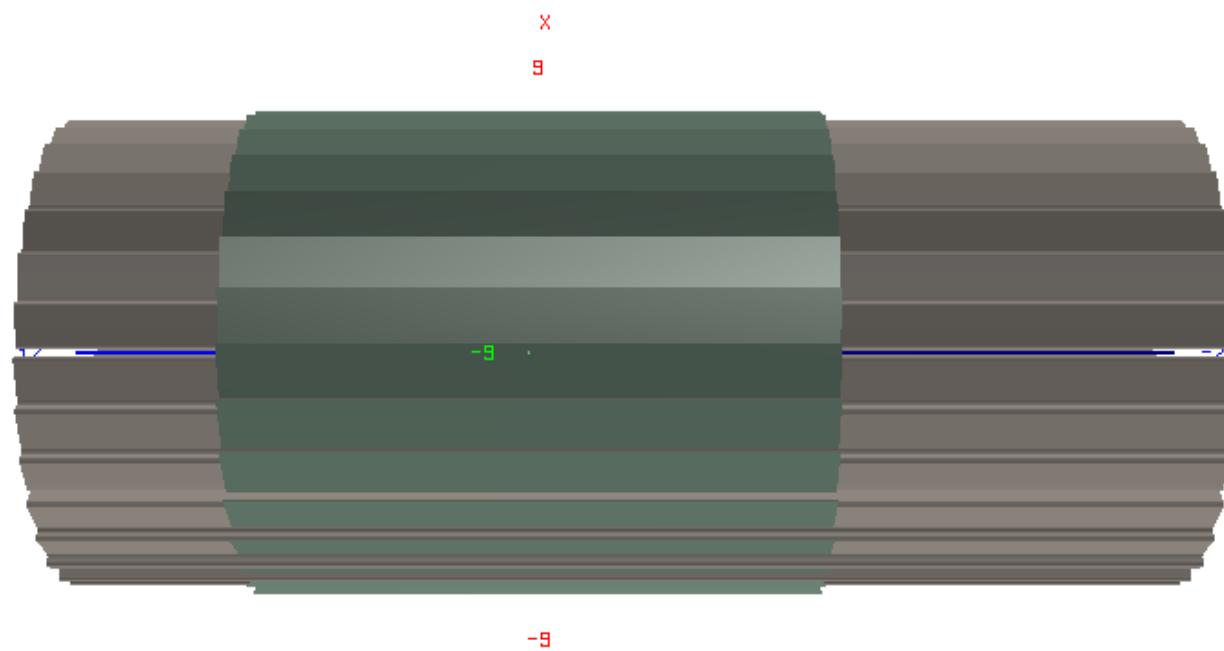

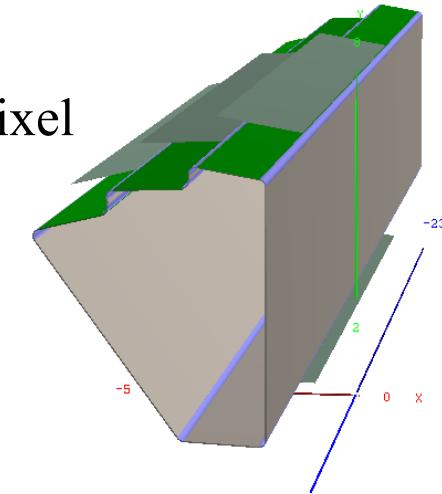

- **HFT Geometry model update**

- Good progress (Flemming/Jonathan/Jason)
- Created Y2013 test geometry in CVS (full HFT detector)

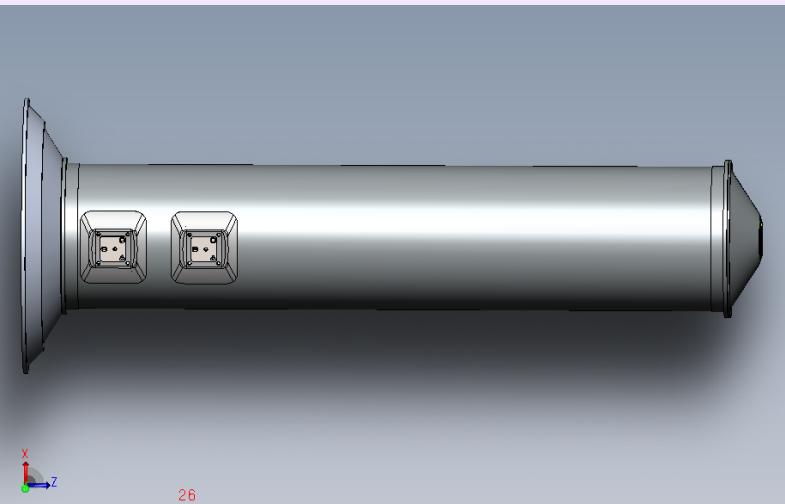

Using Flemming's tool to  
translate SolidWork Model  
to a “root” geometry, the full pixel  
geometry is implemented

# Pixel Support Tube

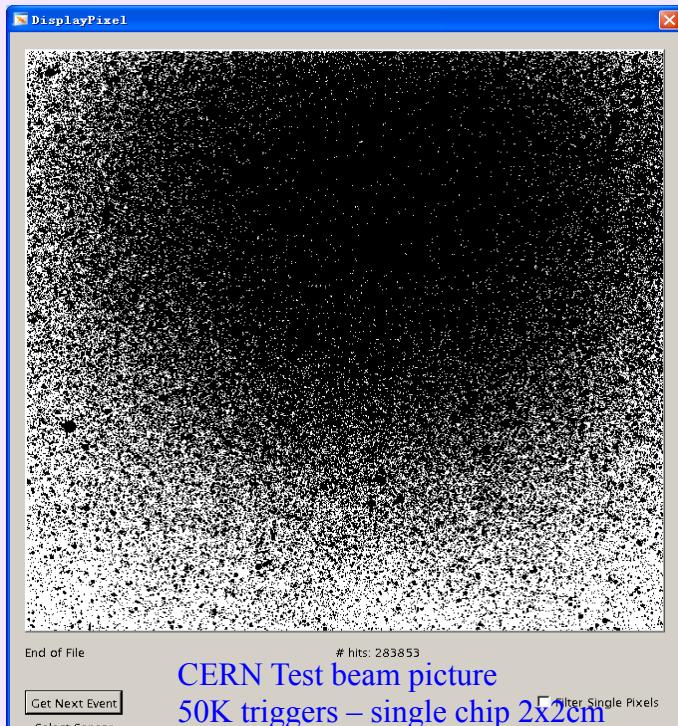

- The same is being done for the PST

- The pixel detector has been implemented in the new geometry software :
  - The pixel is part of the IDSM
  - After correct GEANT hits decoding, STAR software reconstruction chain with this new geometry is possible
  - To check : ladder numbering
- The PST geometry is about to be finalized (clean-up)
- Next steps :
  - Implement the PST within the IDSM
  - Put the correct material for the PST structure etc
  - Rerun simulations

- Slow/Fast PXL response simulation
  - *IHPC people work on:*
    - CERN data (inclined incidence) can fix most parameters
    - Other issues
    - They need/asked for some input from us
      - We had some discussion but nothing definite as answers to them

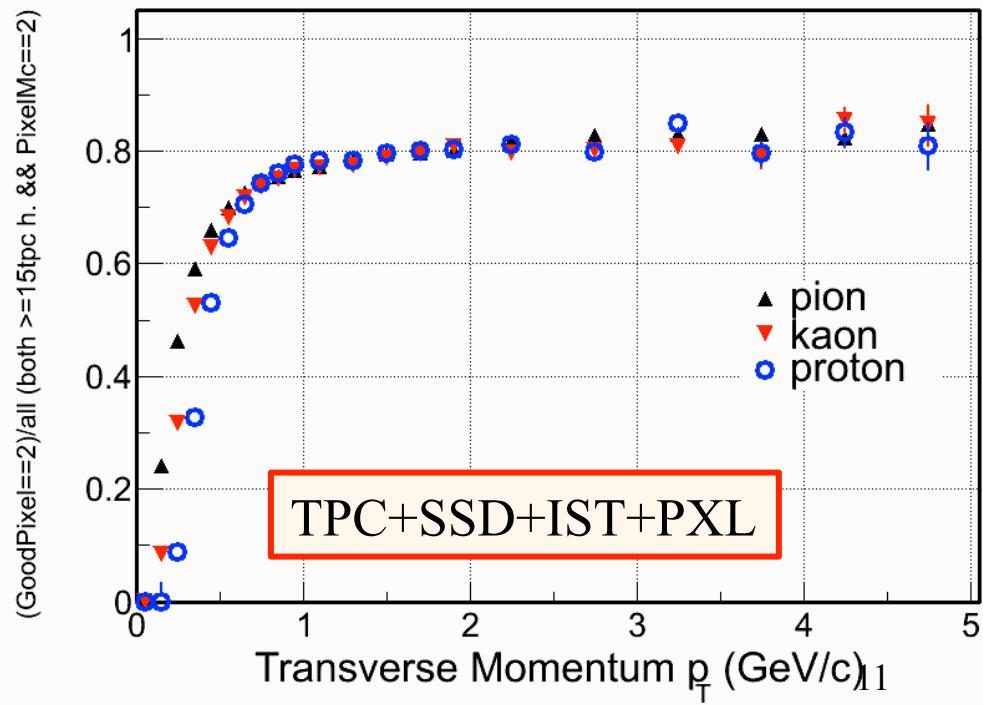

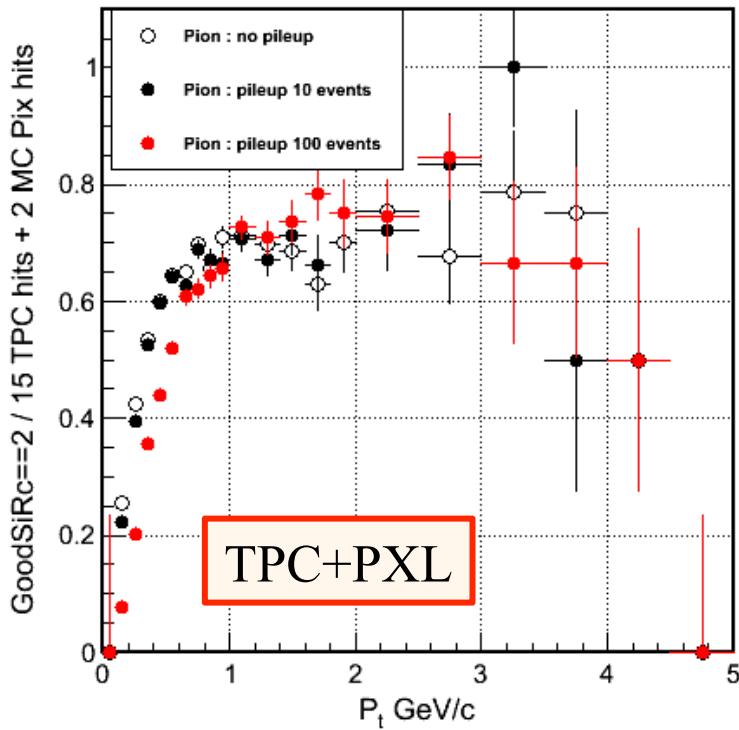

- Tracking with TPC+PXL prototype?
  - Good progress (Jonathan et al)
  - We are done with initial simulations
  - We need to have # of events estimates plus 'reality checks'

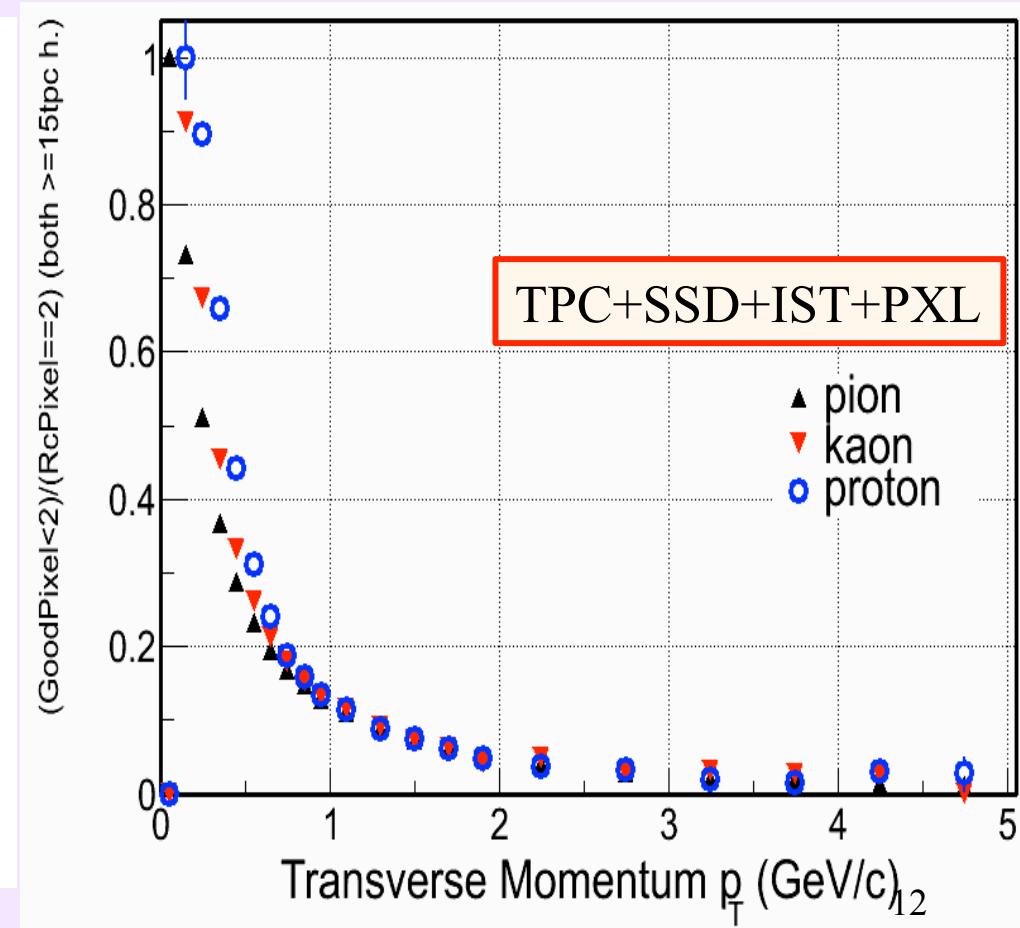

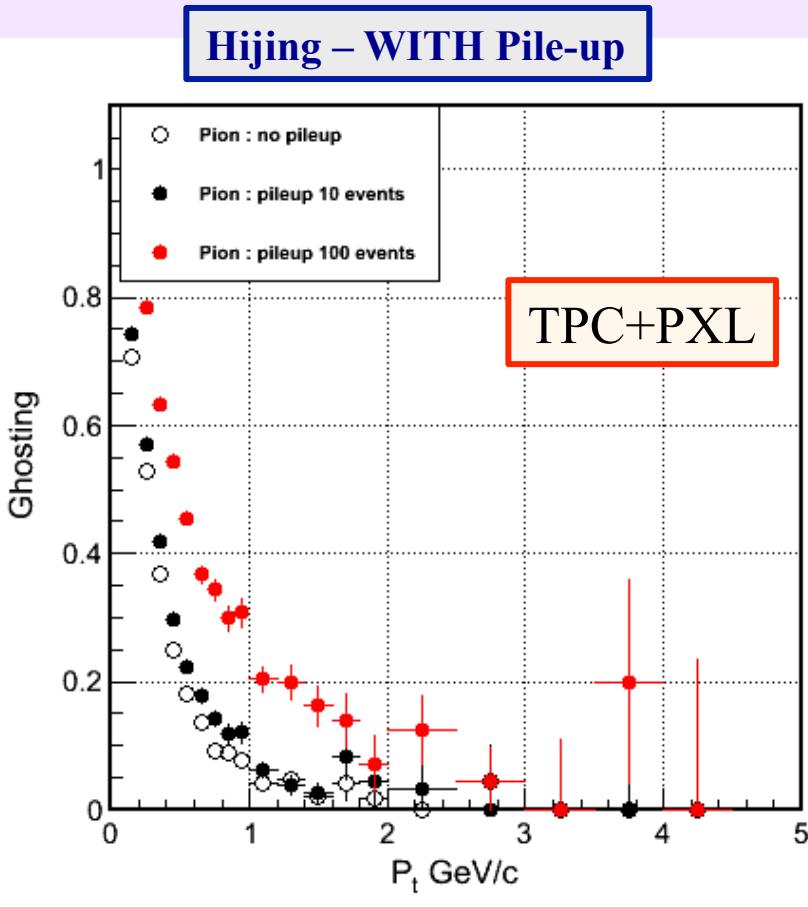

# Prioritized list of Tasks for next year

- **Tracking with TPC+PXL prototype?**
  - Good tracking efficiency (but no pile-up yet)

Hijing – WITH Pile-up

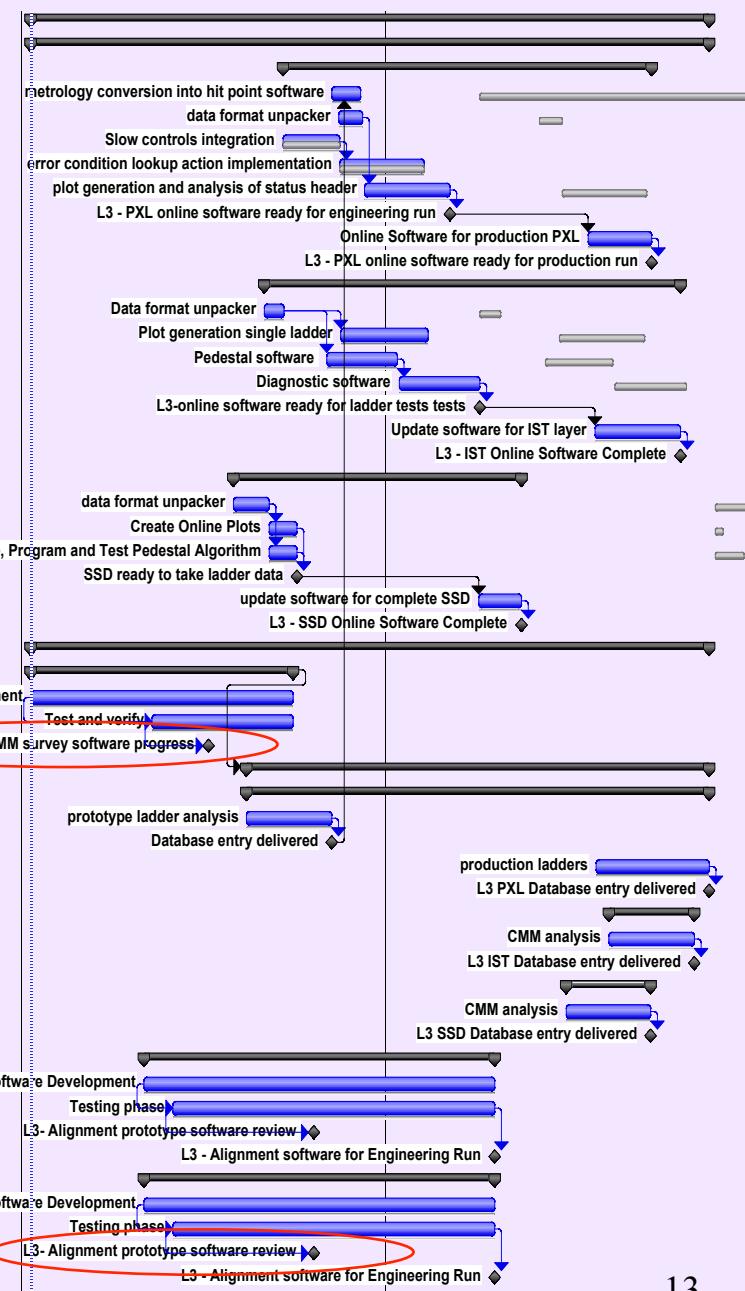

- Tracking with TPC+PXL prototype?
  - Low Ghosting

# Schedule/Milestones (Flemming)

|                |  |    |          |
|----------------|--|----|----------|
| 1.6            | Software   | 0% | 464 days |
| 1.6.1          | Online   | 0% | 464 days |
| 1.6.1.1        | PXL  | 0% | 251 days |
| 1.6.1.1.1      | metrology conversion into hit point software       | 0% | 20 days  |
| 1.6.1.1.2      | data format unpacker                               | 0% | 17 days  |
| 1.6.1.1.3      | Slow controls integration                          | 0% | 40 days  |
| 1.6.1.1.4      | error condition lookup action implementation       | 0% | 60 days  |
| 1.6.1.1.5      | plot generation and analysis of status header      | 0% | 60 days  |
| 1.6.1.1.6      | L3 - PXL online software ready for engineering run | 0% | 0 days   |
| 1.6.1.1.7      | Online Software for production PXL                 | 0% | 45 days  |
| 1.6.1.1.8      | L3 - PXL online software ready for production run  | 0% | 0 days   |
| 1.6.1.2        | IST  | 0% | 284 days |
| 1.6.1.2.1      | Data format unpacker                               | 0% | 14 days  |
| 1.6.1.2.2      | Plot generation single ladder                      | 0% | 61 days  |
| 1.6.1.2.3      | Pedestal software                                  | 0% | 50 days  |
| 1.6.1.2.4      | Diagnostic software                                | 0% | 50 days  |
| 1.6.1.2.5      | L3-online software ready for ladder tests tests    | 0% | 0 days   |
| 1.6.1.2.6      | Update software for IST layer                      | 0% | 60 days  |
| 1.6.1.2.7      | L3 - IST Online Software Complete                  | 0% | 0 days   |
| 1.6.1.3        | SSD  | 0% | 195 days |
| 1.6.1.3.1      | data format unpacker                               | 0% | 25 days  |
| 1.6.1.3.2      | Create Online Plots                                | 0% | 1 mon    |
| 1.6.1.3.4      | Create, Program and Test Pedestal Algorithm        | 0% | 20 days  |
| 1.6.1.3.5      | SSD ready to take ladder data                      | 0% | 0 days   |
| 1.6.1.3.7      | update software for complete SSD                   | 0% | 30 days  |
| 1.6.1.3.8      | L3 - SSD Online Software Complete                  | 0% | 0 days   |
| 1.6.1.4        | Calibration and alignment                          | 0% | 464 days |
| 1.6.1.4.1      | Survey Software                                    | 0% | 180 days |
| 1.6.1.4.1.2    | CMM analysis software development                  | 0% | 9 mons   |
| 1.6.1.4.1.1    | Test and verify                                    | 0% | 5 mons   |
| 1.6.1.4.1.9    | Internal Review of CMM survey software progress    | 0% | 0 days   |
| 1.6.1.4.5      | CMM analysis                                       | 0% | 318 days |
| 1.6.1.4.5.1    | Analysis of PXL                                    | 0% | 318 days |
| 1.6.1.4.5.1.10 | prototype ladder analysis                          | 0% | 3 mons   |
| 1.6.1.4.5.1.11 | Database entry delivered                           | 0% | 0 days   |
| 1.6.1.4.5.1.12 | production ladders                                 | 0% | 4 mons   |
| 1.6.1.4.5.1.13 | L3 PXL Database entry delivered                    | 0% | 0 days   |
| 1.6.1.4.5.2    | Analysis of IST                                    | 0% | 60 days  |
| 1.6.1.4.5.2.5  | CMM analysis                                       | 0% | 3 mons   |
| 1.6.1.4.5.2.6  | L3 IST Database entry delivered                    | 0% | 0 days   |
| 1.6.1.4.5.3    | Analysis of SSD                                    | 0% | 60 days  |
| 1.6.1.4.5.3.1  | CMM analysis                                       | 0% | 3 mons   |
| 1.6.1.4.5.3.2  | L3 SSD Database entry delivered                    | 0% | 0 days   |
| 1.6.1.6        | Global Alignment                                   | 0% | 240 days |
| 1.6.1.6.1      | Software Development                               | 0% | 12 mons  |

| 1.6.1.8.10     | Testing phase                                      | 0% | 11 mons  |
| 1.6.1.8.11     | L3- Alignment prototype software review            | 0% | 0 days   |
| 1.6.1.8.12     | L3 - Alignment software for Engineering Run        | 0% | 0 days   |

NOW

# Operations support

- To be done (didn't have time to work on Flemming's document estimates)

# Summary

- Things are moving but more institutional involvement will definitely help
